PERFECT FOR FEEDING AMONG OTHERS:

APPLICATION:

Vital is a nutrient rich, complete granulated diet for all common smaller tropical fish. Vital partly sinks, with different velocities, while the other part floats on the surface for a while. In this way the fish can easily take up the granules.

This granulate is very suitable for tetra's, guppy's and other smaller tropical species.

* Feed 2-3 times per day in small portions. Feed as much the fish can eat in 20 – 30 seconds.
